

Men's Sizing Guide **UK(FR) SIZE**

For fitting accuracy follow the steps below:

Print Accuracy Check:

- Print out this size guide choosing "Actual size" or "100 %" from printing options to ensure print accuracy.
- Measure with a ruler on "Print Accuracy Check" to ensure print accuracy.

How to measure:

1. Wear the regular socks that you would for work.
2. Place fitting scale on the floor and place your right foot on the "FOOTPRINT" by aligning your heel and the inside of your foot to the edges marked with bold lines.
3. While standing look straight down to take the reading of your size.
4. Your size is the number corresponding to the next number "Size Band" which the tip of your toe reaches.
5. When your toe crosses a line, select the next larger size. For instance, your toe crosses the size 8 line, you should choose our size 9 footwear.
6. You are done!

Measuring Tips:

- Reference the size of the shoe you are currently wearing.
- Our shoes are designed to a generous fit and to accommodate thicker socks, if you normally wear a size 11 shoes comfortably, please choose our size 10 for a better fit. Using the footprint on this guide can help you to visualize and decide.
