ABOUT KPR®

KPR has 50 years of safety shoemaking experience with manufacturing facilities in China, Malaysia, Indonesia, and Canada. KPR's vertical integration of its manufacturing process, whereby every part of a footwear is manufactured and assembled in-house, allows for speed, control and flexibility in the manufacturing process.

WHY KPR®?

RELIABLE PARTNER

Our customer service and sales representative teams have the expertise to answer any questions you have about choosing the right safety footwear for your industry.

PEACE OF MIND

KPR's leading edge technical center for outsole research and development is committed to producing the highest quality safety footwear in durability and comfort.

QUALITY ASSURANCE

KPR's state of the art testing lab ensures our quality management system meets the highest requirements and our plant is certified in accordance with the ISO 9001:2015 quality management standard.

BENEFITS OF COMPOSITE TOECAP

- Metal-free work shoes, practical when working in electrical hazardous environments, or workplaces with metal detectors such as airports, ...
- Lighter compared to a steel toe, reducing stress and fatigue on the legs and joints throughout long workdays.
- Not conducting heat or cold in extreme temperatures, for extra comfort.
